

## (EN) Manual No. 48373.PROV2 Flightcontrol

### Technical data:

STM32 F303 MCU, runs with Betaflight firmware (support from v3.0), MPU6000 via SPI Bus, size 35x35mm, mounting holes 30,5x30,5mm, 4PWM output in JST SH6 connector and soldering place for pins, input voltage Lipo (2-6S), 5V 1A BEC output, SD-card slot, STM32 controls OSD Chip via SPI in DMA modus, external SPI-interface for additional applications, less CPU using, faster rate, internal current sensor, internal PDB, internal LC-Filter
